

Data sheet

External cooling system

COOLER 6000/8500

DESCRIPTION

External, compressor-based cooling system that supports the internal cooling system installed in the laser.

TECHNICAL DATA

COOLER 6000 - Compressor cooling system with a cooling capacity of 3 kW, weight: 60 kg, Dimensions: height: 920 mm x width: 480 mm x depth: 550 mm + 120 mm (fittings and hoses), Power supply: 230 V AC (single-phase), power: 1135 W. Ideal for 100-200W systems.

COOLER 8500 - Compressor cooling system with a cooling capacity of 8.2 kW, weight: 120 kg, Dimensions: height: 1110 mm x width: 610 mm x depth: 750 mm + 120 mm (fittings and hoses), Power supply: 400 V AC (three-phase), power: 3570 W. Ideal for 200-300W systems

VARIANTS

COOLER - 6000	32-ChZ60
COOLER - 8500	32-ChZ85

OPTIONAL ADDITIONAL COMPONENTS (Not included in the set)

-

APPLICATION

All LaserPoint NdYAG* welding systems
(* - equipped with a heat exchanger)

SPARE PARTS

-

PACKAGE CONTENTS

External cooling system, connection hoses.

WARRANTY CONDITIONS

12 months from the date of purchase.
